AI SYSTEMS · CONTENT · ENGINE OPTIMIZATION

Mudit Chopra

I don't do the work anymore — my systems do. I design end-to-end AI agents that handle research, strategy and content production from start to finish.

- **4+** production AI agents shipped
- **50+** AI tools in 2 years
- **AIEO · GEO** specialist

WHO I AM

Builder of autonomous AI systems, not one-off prompts.

Over the last two years I've gone from using AI tools to architecting full agentic pipelines — MCP servers, multi-tool reasoning loops and content engines deployed live on production infrastructure.

6
ROLE AI CONTENT TEAM

AIEO & GEO — getting brands cited by AI.

The search layer is shifting from blue links to AI answers. I optimize content so it gets surfaced and cited inside ChatGPT, Perplexity, Gemini and Google AI Overviews — not just ranked on page one.

AIEO

- AI Engine Optimization
- Structuring content for LLM retrieval
- Entity & citation positioning
- Answer-ready formatting

GEO

- Generative Engine Optimization
- Optimizing for Perplexity / AI Overviews
- Source authority signals
- Prompt-intent mapping

AI Content

- Agentic content pipelines
- Reference-driven script systems
- Multi-platform repurposing
